

TB-01/TB-01A BOX TRIPOD TURNSTILE

Card reader, built-in

Application

The TB-01 box tripod turnstile offers an elegant and compact solution for entrance ways with high flow at sites where interior aesthetics and security are high priorities. Fitted with two readers with Wiegand interface the turnstile can be easily integrated in any access control system.

Delivery set

- turnstile with built-in electronics and 2 readers (EMM/HID)
- remote control panel
- standard/anti-panic barrier arms (the type is chosen by a Client at the time of order)

Design

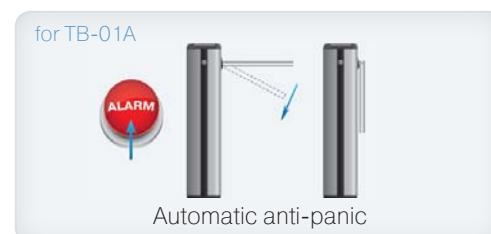

Thanks to its design, when installed in a line, the TB-01 housings ensure secure controlled passageway, providing space-effective solution for your entrance point. Inbuilt readers will save your time, expenses and installation efforts ensuring nice concealed mounting of card readers.
